-  Workforce Management
-  Training & Development

Channels Supported

-  Voice
-  Chat
-  Email
-  SMS
-  Mobile App
-  Social Media

Capabilities for Government

TLCx brings decades of experience delivering high-impact, high-speed, and high-compliance support to public sector programs and advocacy campaigns.

Proven Performance in Government & Advocacy

FEMA Response Deployment: Activated 1,200+ agents in under 5 days to manage emotionally high-stakes inbound volume during a disaster response.

Legal Coordination Services: 24/7 bilingual support for remote court scheduling, documentation processing, and public access.

Civic Engagement Campaigns: Voice + SMS voter contact and awareness programs across 200+ campaigns in 10+ states.

CX Support Across Sensitive Public Sector Services

TLCx supports secure, responsive, and compliant citizen experiences through:

- Emergency Services & FEMA Response
- Citizen Engagement Centers
- Remote Legal Scheduling & Court Coordination
- Legal Representation Support
- CX Delivery under High Compliance & Security Protocols

This government-facing capability suite pairs TLCx's tech-forward delivery model with deep operational agility, ideal for federal, state, and local programs requiring trust, speed, and scale.

Our Intelligent CX Tech Stack

TLCx leverages a deeply integrated AI-enabled BPO model to drive faster resolution, smarter workflows, and more consistent customer experiences—without losing the human connection. Our technology stack includes advanced tools built to elevate agent performance, customer satisfaction, and operational oversight across every channel.

Core Capabilities Include:

AI Agent Assist & Real-Time Coaching Supports voice, chat, and messaging with real-time guidance, next-best action prompts, and dynamic scripting—helping agents deliver faster, more accurate responses.	Interactive Knowledge Base Automatically generates, organizes, and refines FAQs and resources using AI-powered content modeling to reduce training time and support consistency.	Quality Assurance Automation Real-time monitoring and correction of agent interactions, with intelligent alerting and dashboard views for QA leaders to assess performance at a glance.
Performance & Skill Mapping Customizable dashboards to track agent metrics, training effectiveness, and behavior trends, providing 100% visibility across teams and geographies.	Fraud Detection & Voice Authentication AI-driven voice verification helps detect synthetic audio, verify caller identity, and flag risks instantly without disrupting the customer experience.	Compliance & Oversight Tools Supervisor portals and live dashboards allow leadership to monitor call status, idle time, average handling time, and agent behavior across multiple sites or vendors.
